### SAFETY INSTRUCTIONS: ALWAYS READ BEFORE USE AND FOLLOW CAREFULLY

**This product is not intended for use on persons under the age of 16.**

#### IGNORING AN ALLERGY CAN BE LIFE-THREATENING

**It is essential that you always perform an ALLERGY ALERT TEST 48 hours before each use of this product, as an allergy can develop suddenly even though you have previously used a hair colorant of this or any other brand.**

This test represents an important precaution which has proved to be reliable when carried out under the condition outlined below. However, be aware that even if an allergy alert test has been carried out you may still experience an allergic reaction when you color your hair. The allergy alert test is not a guarantee of avoiding future allergic reactions.

**Please consult a doctor, if you have any doubts.**

#### IMPORTANT: HAIR COLORANTS CAN CAUSE SEVERE ALLERGIC REACTIONS.

To help you reduce the risk of an allergic reaction, it is essential to follow the precautions below.

#### Do not color your hair if:

- ▶ you have a rash on your face or sensitive, irritated and damaged scalp.
- ▶ you have ever experienced any reaction after coloring your hair.

#### TEMPORARY "BLACK HENNA" TATTOOS MAY INCREASE YOUR RISK OF ALLERGY, EVEN PERFORMED A LONG TIME AGO:

- ▶ If you have experienced a reaction to a temporary "black henna" tattoo in the past: do not color your hair in any case
- ▶ Even without experiencing a reaction, you are likely to have become allergic without realising it: never use this product unless you have done the allergy alert test 48 hours before use.

#### HOW TO PERFORM THE ALLERGY ALERT TEST: 48hrs before the coloration

- ▶ **Remove earrings.** Behind the ear and using a cotton wool-bud, apply a small quantity of unmixed colorant product (2 - Colorant Cream) to cover an area of 2 cm<sup>2</sup> (e.g. the size of a small coin). Allow to dry. Carefully reseat the Colorant Cream and keep it for the application 48 hours later.

- ▶ Leave for 48 hours without washing, covering or touching.

If during this period you notice any abnormal reactions, such as itching, redness or swelling in or around the test area,

**DO NOT APPLY THE PRODUCT.**
