PROFESSIONAL ADVICE

IMPORTANT ADVICE

Before application, please read the **SAFETY INSTRUCTIONS** below carefully.

HELPFUL HINTS

- We recommend to repeat the application every 4 weeks as the hair grows approximately 1 cm per month.
- Next time you wash your hair, you can use the bonding mask again for perfectly cared hair.
- You can use a lipbalm to protect your forehead skin from color stains.
- For hair longer than chin length, we recommend to use two packs. Leave at least 2 weeks between coloring and applying a perm/straightening treatment to your hair, otherwise the color result could become uneven.
- If your hair is bleached, straightened, sun exposed or permed, we recommend reducing the processing time about **5–10 minutes**.
- Creme Surpreme is easy to remove from skin with water and soap, or facial water.

ATTENTION

- After mixing, **immediately break off the tip** of the Applicator Bottle, as foam or excess pressure may occur after a couple of minutes as a result of oxygen generation.
- Start with the application immediately after mixing. If using two packs, first mix and use the first pack entirely, and then open, mix and apply the second pack without any delay.
- Discard any unused mixture promptly. Do not attempt to store or reseal after mixing. Resealing may cause the container to burst.
- While coloring do not cover the hair with plastic or aluminum foil and avoid external warmth influence (e.g. hair-dryer, hairdrying cap, blow dryer or sauna).

SAFETY INSTRUCTIONS

 Hair colorants can cause severe allergic reactions. Read and follow instructions. This product is not intended for use on persons under the age of 16. Temporary “black henna” tattoos may increase your risk of allergy.

Do not colour your hair if:

- you have a rash on your face or sensitive, irritated and damaged scalp,
- you have ever experienced any reaction after colouring your hair,
- you have experienced a reaction to a temporary ‘black henna’ tattoo in the past.

Do not use to dye eyelashes or eyebrows.

Contains: see folding box. Rinse hair well after application.

Do not use to dye eyelashes or eyebrows. Avoid contact with eyes. Rinse immediately if product comes into contact with them. Wear suitable gloves.

Keep out of reach of children.

Keep the empty carton and the instruction leaflet in case you experience a reaction. To reduce your risk follow these instructions.

1. ALLERGY ALERT TEST

Perform an allergy alert test 48 hours before each product use even if you have already used colouring products before. Items you need to prepare the mixture:

Cotton bud or wooden stick, tissue paper, saucer / small plate (do not use metal objects). Prepare the mixture: Open the application bottle with developer lotion by unscrewing the complete cap. Remove a small amount of developer lotion with the cotton bud/wooden stick and place it in the saucer. Open the tube of colour cream by piercing the tube seal with the back of the cap. Add about the same quantity of colour cream to the saucer and mix both with the cotton bud to a homogeneous mixture. Do not use metal objects. Carefully reseal the colourant and developer containers. With the cotton bud, apply a pea size of the mixture evenly in a thin layer on an area of 2 by 2 cm on the inner side of the forearm. Leave the mixture applied for 45 minutes without covering or touching it; avoid contact with clothes; after 45 minutes wash the test area with water and pat dry with a clean tissue.

If you observe any changes to the normal skin appearance, such as itching, redness, swelling on and around the test area during the testing time, or during the following 48hrs, you should rinse off the test area immediately, should not use the product and should consult a doctor.

SAFETY INSTRUCTIONS

! Hair colorants can cause severe allergic reactions. Read and follow instructions. This product is not intended for use on persons under the age of 16. Temporary "black henna" tattoos may increase your risk of allergy.

Do not colour your hair if:

- you have a rash on your face or sensitive, irritated and damaged scalp,
- you have ever experienced any reaction after colouring your hair,
- you have experienced a reaction to a temporary 'black henna' tattoo in the past.

Do not use to dye eyelashes or eyebrows. Contains: see folding box. Rinse hair well after application.

Do not use to dye eyelashes or eyebrows. Avoid contact with eyes. Rinse immediately if product comes into contact with them. Wear suitable gloves. Keep out of reach of children. Keep the empty carton and the instruction leaflet in case you experience a reaction. To reduce your risk follow these instructions.

1. ALLERGY ALERT TEST

Perform an allergy alert test 48 hours before each product use even if you have already used colouring products before. Items you need to prepare the mixture: Cotton bud or wooden stick, tissue paper, saucer / small plate (do not use metal objects). Prepare the mixture: Open the application bottle with developer lotion by unscrewing the complete cap. If you observe any changes to the normal skin appearance, such as itching, redness, swelling on and around the test area during the testing time, or during the following 48hrs, you should rinse off the test area immediately, should not use the product and should consult a doctor.

This test represents an important precaution measure which has proved to be reliable when carried out under the conditions outlined. However, be aware that even if an Allergy Alert Test has been carried out without symptoms, you may still experience an allergic reaction when you colour your hair.

The Allergy Alert Test does not provide a guarantee that allergic reactions will not occur in the future. In case of any concerns or questions please consult a doctor.

2. IF DURING COLOURING YOU EXPERIENCE

- any stinging or burning and/or rash, rinse immediately and discontinue colouring your hair as this may be an indication of a more serious reaction. Do not colour your hair again before consulting a doctor or seeking medical advice.
- rapidly spreading skin rash, dizziness or faintness, shortness of breath and/or swelling of eyes/face, rinse immediately and seek immediate medical attention and contact the manufacturer.

3. IF AFTER COLOURING OR ON THE FOLLOWING DAYS YOU EXPERIENCE

problems such as skin or scalp itching, skin or scalp rash, swelling of eyes/face, blistering and/or skin or scalp weeping, seek immediate medical attention and contact the manufacturer.

PRECAUTIONS

- This product contains ingredients which may cause severe eye irritation and possible permanent eye injury. If the developer or hair colour mixture gets into your eye, flush immediately with a large amount of lukewarm water and seek medical advice.
- If you wear contact lenses during application and any product gets into your eye, remove the contact lens first, then flush immediately with a large amount of lukewarm water and seek medical advice.
- Do not inhale or ingest the product.
- Avoid unnecessary skin contact.
- Do not use if your hair has been coloured with henna or metal dyes.
- Remove all metal objects such as clips and hair pins from hair before colouring and keep them away during colouring. Do not use metal tools.
- Keep developer away from heat and light. Do not mix this colorant with any other products. Do not keep any unused product. Do not leave the mixture in a closed bottle (bottle may expand or burst).
- Do not use on other than scalp hair, especially not on facial hair.

- Next time you wash your hair, you can use the bonding mask again for perfectly cared hair.
- You can use a lipbalm to protect your forehead skin from color stains.
- For hair longer than chin length, we recommend to use two packs. Leave at least 2 weeks between coloring and applying a perm/straightening treatment to your hair, otherwise the color result could become uneven.
- If your hair is bleached, straightened, sun exposed or permed, we recommend reducing the processing time about **5-10 minutes**.
- Creme Supreme is easy to remove from skin with water and soap, or facial water.

ATTENTION

- After mixing, **immediately break off the tip** of the Applicator Bottle, as foam or excess pressure may occur after a couple of minutes as a result of oxygen generation.
- Start with the application immediately after mixing. If using two packs, first mix and use the first pack entirely, and then open, mix and apply the second pack without any delay.
- Discard any unused mixture promptly. Do not attempt to store or reseal after mixing. Resealing may cause the container to burst.
- While coloring do not cover the hair with plastic or aluminum foil and avoid external warmth influence (e.g. hair-dryer, hairdrying cap, blow dryer or sauna).

SAFETY INSTRUCTIONS

! Hair colorants can cause severe allergic reactions. Read and follow instructions. This product is not intended for use on persons under the age of 16. Temporary "black henna" tattoos may increase your risk of allergy.

Do not colour your hair if:

- you have a rash on your face or sensitive, irritated and damaged scalp,
- you have ever experienced any reaction after colouring your hair,
- you have experienced a reaction to a temporary 'black henna' tattoo in the past.

Do not use to dye eyelashes or eyebrows. Contains: see folding box. Rinse hair well after application.

Do not use to dye eyelashes or eyebrows. Avoid contact with eyes. Rinse immediately if product comes into contact with them. Wear suitable gloves. Keep out of reach of children. Keep the empty carton and the instruction leaflet in case you experience a reaction. To reduce your risk follow these instructions.

1. ALLERGY ALERT TEST

Perform an allergy alert test 48 hours before each product use even if you have already used colouring products before. Items you need to prepare the mixture:

Cotton bud or wooden stick, tissue paper, saucer / small plate (do not use metal objects). Prepare the mixture: Open the application bottle with developer lotion by unscrewing the complete cap. Remove a small amount of developer lotion with the cotton bud/wooden stick and place it in the saucer. Open the tube of colour cream by piercing the tube seal with the back of the cap. Add about the same quantity of colour cream to the saucer and mix both with the cotton bud to a homogeneous mixture. Do not use metal objects. Carefully reseal the colourant and developer containers. With the cotton bud, apply a pea size of the mixture evenly in a thin layer on an area of 2 by 2 cm on the inner side of the forearm. Leave the mixture applied for 45 minutes without covering or touching it; avoid contact with clothes; after 45 minutes wash the test area with water and pat dry with a clean tissue.

If you observe any changes to the normal skin appearance, such as itching, redness, swelling on and around the test area during the testing time, or during the following 48hrs, you should rinse off the test area immediately, should not use the product and should consult a doctor.

This test represents an important precaution measure which has proved to be reliable when carried out under the conditions outlined. However, be aware that even if an Allergy Alert Test has been carried out without symptoms, you may still experience an allergic reaction when you colour your hair.

The Allergy Alert Test does not provide a guarantee that allergic reactions will not occur in the future. In case of any concerns or questions please consult a doctor.

2. IF DURING COLOURING YOU EXPERIENCE

- any stinging or burning and/or rash, rinse immediately and discontinue colouring your hair as this may be an indication of a more serious reaction. Do not colour your hair again before consulting a doctor or seeking medical advice.
- rapidly spreading skin rash, dizziness or faintness, shortness of breath and/or swelling of eyes/face, rinse immediately and seek immediate medical attention and contact the manufacturer.

3. IF AFTER COLOURING OR ON THE FOLLOWING DAYS YOU EXPERIENCE

problems such as skin or scalp itching, skin or scalp rash, swelling of eyes/face, blistering and/or skin or scalp weeping, seek immediate medical attention and contact the manufacturer.

PRECAUTIONS

- This product contains ingredients which may cause severe eye irritation and possible permanent eye injury. If the developer or hair colour mixture gets into your eye, flush immediately with a large amount of lukewarm water and seek medical advice.
- If you wear contact lenses during application and any product gets into your eye, remove the contact lens first, then flush immediately with a large amount of lukewarm water and seek medical advice.
- Do not inhale or ingest the product.
- Avoid unnecessary skin contact.
- Do not use if your hair has been coloured with henna or metal dyes.
- Remove all metal objects such as clips and hair pins from hair before colouring and keep them away during colouring. Do not use metal tools.
- Keep developer away from heat and light. Do not mix this colorant with any other products. Do not keep any unused product. Do not leave the mixture in a closed bottle (bottle may expand or burst).
- Do not use on other than scalp hair, especially not on facial hair.

PROFESSIONAL ADVICE	PROFESSIONAL ADVICE	PROFESSIONAL ADVICE	PROFES-	SIONAL ADVICE
IMPORTANT ADVICE Before application, please read the <u>SAFETY INSTRUCTIONS</u> below carefully. HELPFUL HINTS • We recommend to repeat the application every 4 weeks as the hair grows approximately 1 cm per month. • Next time you wash your hair, you can use the bonding mask again for perfectly cared hair. • You can use a lipbalm to protect your forehead skin from color stains. • For hair longer than chin length, we recommend to use two packs. Leave at least 2 weeks between coloring and applying a perm/straightening treatment to your hair, otherwise the color result could become uneven. • If your hair is bleached, straightened, sun exposed or permed, we recommend reducing the processing time about 5-10 minutes. • Creme Supreme is easy to remove from skin with water and soap, or facial water. SAFETY INSTRUCTIONS  Hair colorants can cause severe allergic reactions. Read and follow instructions. This product is not intended for use on persons under the age of 16. Temporary "black henna" tattoos may increase your risk of allergy. Do not colour your hair if: — you have a rash on your face or sensitive, irritated and damaged scalp, — you have ever experienced any reaction after colouring your hair, — you have experienced a reaction to a temporary "black henna" tattoo in the past. Do not use to dye eyelashes or eyebrows. Contains: see folding box. Rinse hair well after application. Do not use to dye eyelashes or eyebrows. Avoid contact with eyes. Rinse immediately if product comes into contact with them. Wear suitable gloves. Keep out of reach of children. Keep the empty carton and the instruction leaflet in case you experience a reaction. To reduce your risk follow these instructions. 1. ALLERGY ALERT TEST Perform an allergy alert test 48 hours before each product use even if you have already used colouring products before. Items you need to prepare the mixture: Cotton bud or wooden stick, tissue paper, saucer / small plate (do not use metal objects). Prepare the mixture: Open the application bottle with developer lotion by unscrewing the complete cap. Remove a small amount of developer lotion with the cotton bud/wooden stick and place it in the saucer. Open the tube of colour cream by piercing the tube seal with the back of the cap. Add about the same quantity of colour cream to the saucer and mix both with the cotton bud to a homogeneous mixture. Do not use metal objects. Carefully reseal the colourant and developer containers. With the cotton bud, apply a pea size of the mixture evenly in a thin layer on an area of 2 by 2 cm on the inner side of the forearm. Leave the mixture applied for 45 minutes without covering or touching it; avoid contact with clothes; after 45 minutes wash the test area with water and pat dry with a clean tissue. If you observe any changes to the normal skin appearance, such as itching, redness, swelling on and around the test area during the testing time, or during the following 48hrs, you should rinse off the test area immediately, should not use the product and should consult a doctor. This test represents an important precaution measure which has proved to be reliable when carried out under the conditions outlined. However, be aware that even if an Allergy Alert Test has been carried out without symptoms, you may still experience an allergic reaction when you colour your hair. The Allergy Alert Test does not provide a guarantee that allergic reactions will not occur in the future. In case of any concerns or questions please consult a doctor. 2. IF DURING COLOURING YOU EXPERIENCE — any stinging or burning and/or rash, rinse immediately and discontinue colouring your hair as this may be an indication of a more serious reaction. Do not colour your hair again before consulting a doctor or seeking medical advice. — rapidly spreading skin rash, dizziness or faintness, shortness of breath and/or swelling of eyes/face, rinse immediately and seek immediate medical attention and contact the manufacturer. 3. IF AFTER COLOURING OR ON THE FOLLOWING DAYS YOU EXPERIENCE problems such as skin or scalp itching, skin or scalp rash, swelling of eyes/face, blistering and/or skin or scalp weeping, seek immediate medical attention and contact the manufacturer. PRECAUTIONS • This product contains ingredients which may cause severe eye irritation and possible permanent eye injury. If the developer or hair colour mixture gets into your eye, flush immediately with a large amount of lukewarm water and seek medical advice. • If you wear contact lenses during application and any product gets into your eye, remove the contact lens first, then flush immediately with a large amount of lukewarm water and seek medical advice. • Do not inhale or ingest the product. • Avoid unnecessary skin contact. • Do not use if your hair has been coloured with henna or metal dyes. • Remove all metal objects such as clips and hair pins from hair before colouring and keep them away during colouring. Do not use metal tools. • Keep developer away from heat and light. Do not mix this colorant with any other products. Do not keep any unused product. Do not leave the mixture in a closed bottle (bottle may expand or burst). • Do not use on other than scalp hair, especially not on facial hair. 1. ALLERGY ALERT TEST	1. ALLERGIEVERDACHTSTEST	1. TEST D'ALERTE D'ALLERGIE	1. ALLERGIE WAARSCHUWINGSTEST	1. TEST RIVELATORE DI ALLERGIA
Perform an allergy alert test 48 hours before each product use even if you have already used colouring products before.	Führen Sie einen Allergieverdachtstest 48 Stunden vor jeder Anwendung einer Haarcoloration durch, auch dann, wenn Sie schon früher Haarcolorationen angewendet haben.	Le test d'alerte d'allergie doit être effectué 48 heures avant chaque utilisation du produit, même si un produit de coloration capillaire a été utilisé auparavant.	De allergiewaarschuwingstest moet 48 uur vóór elk gebruik van het product worden uitgevoerd, ook al heeft u in het verleden al eens eerder een haarkleurproduct is gebruikt.	Effettuare un test rivelatore di allergia 48 ore prima di utilizzare qualsiasi prodotto, anche se hai già utilizzato prodotti coloranti in precedenza.
Items you need to prepare the mixture: Cotton bud or wooden stick, tissue paper, saucer / small plate (do not use metal objects).	Für die Zubereitung der Mischung benötigte Gegenstände: Wattestäbchen/Holzstäbchen, Kosmetiktücher, Untertasse / kleiner Teller (keine Metallgegenstände verwenden).	Éléments dont vous avez besoin pour préparer le mélange : coton-tige, tissus propres, soucoupe / petite assiette (ne pas utiliser d'objets métalliques).	Benodigdheden om het mengsel voor te bereiden: wattenstaafje, papieren zakdoekje, schoteltje of bordje (gebruik geen metalen voorwerpen).	Articoli necessari per preparare la miscela per effettuare il test: batuffoli di cotone o bastoncini di legno, fazzolettini di carta, piattino/piatto piccolo (non utilizzare oggetti metallici).
Prepare the mixture: Open the application bottle with developer lotion by unscrewing the complete cap. Remove a small amount of developer lotion with the cotton bud/wooden stick and place it in the saucer.	Bereiten Sie die Mischung vor: Öffnen Sie die Anwendungsflasche mit der Entwicklerlotion durch Abschrauben der kompletten Verschlusskappe. Entnehmen Sie mit dem Watte- bzw. Holzstäbchen eine kleine Menge der Haare gut spülen und geben diese in die Untertasse/den Teller.	Préparer le mélange : Ouvrir le flacon d'application avec l'émulsion révélatrice en dévissant complètement le bouchon. Retirez une petite quantité d'émulsion révélatrice avec le coton-tige et placez-la dans la soucoupe.	Bereid het mengsel voor: Open de applicatieflacon met ontwikkelmelisie door de dop volledig los te draaien. Neem een kleine hoeveelheid ontwikkelmelisie met het wattenstaafje en plaats dit in het schoteltje.	Preparazione della miscela: con un batuffolo di cotone/bastoncino di legno rimuovere una piccola quantità di lozione rivelatrice e inserirla nel piattino.
Open the tube of colour cream by piercing the tube seal with the back of the cap. Add about the same quantity of colour cream to the saucer and mix both with the cotton bud to a homogeneous mixture. NOTE: please adapt accordingly for liquid colours.	Öffnen Sie die Tube der Farbcreme, indem Sie die Tubenversiegelung mit der Rückseite der Verschlusskappe durchstechen. Geben Sie eine etwa gleichgroße Menge der Farbcreme ebenfalls in die Untertasse/den Teller und vermischen Sie beides mit dem Stäbchen zu einer homogenen Mischung. NOTE: please adapt accordingly for liquid colours.	Ouvrir le tube de crème colorante en perçant l'opercule du tube avec le dos du bouchon. Ajouter environ la même quantité de crème colorante dans la soucoupe et mélanger les deux avec le coton-tige jusqu'à l'obtention d'un mélange homogène. NOTE: please adapt accordingly for liquid colours.	Open de tube kleurcrème door met de achterkant van de dop een gaatje in het aluminiumfolie te prikken. Voeg ongeveer dezelfde hoeveelheid kleurcrème toe aan het schoteltje en meng beide met het wattenstaafje tot een homogeen mengsel. NOTE: please adapt accordingly for liquid colours.	Aprire il tubetto di crema colorante forando il sigillo con il retro del tappo. Aggiungere circa la stessa quantità di crema colorante nel piattino e mescolare con un batuffolo di cotone fino ad ottenere un composto omogeneo. NOTE: please adapt accordingly for liquid colours.
Do not use metal objects. Carefully reseal the colourant and developer containers.	Verwenden Sie keine Metallgegenstände. Verschließen Sie die Farbstoff- und Entwicklerbehälter wieder sorgfältig.	Ne pas utiliser d'objets métalliques. Refermez soigneusement les emballages de crème colorante et d'émulsion révélatrice.	Gebruik geen metalen voorwerpen. Sluit de verpakkingen van kleurcrème en ontwikkelmelisie zorgvuldig weer af.	Non utilizzare oggetti metallici. Richiudere accuratamente i contenitori della crema colorante e della lozione rivelatrice.
With the cotton bud, apply a pea size of the mixture evenly in a thin layer on an area of 2 by 2 cm on the inner side of the forearm. Leave the mixture applied for 45 minutes without covering or touching it; avoid contact with clothes; after 45 minutes wash the test area with water and pat dry with a clean tissue.	Tragen Sie nun mit dem Wattestäbchen eine erbsengroße Menge der Mischung gleichmäßig in einer dünnen Schicht auf eine Fläche von 2 x 2 cm auf der Innenseite des Unterarms auf. Lassen Sie die Mischung 45 Minuten lang einwirken, ohne sie abzudecken oder zu berühren; vermeiden Sie den Kontakt mit der Kleidung; waschen Sie die Teststelle nach 45 Minuten mit Wasser ab und tupfen Sie diese mit einem sauberen Tuch trocken.	À l'aide du coton-tige, appliquez une quantité de mélange de la taille d'un pois uniformément en couche mince sur une zone de 2 cm sur 2 cm sur la face interne de l'avant-bras. Laissez le mélange poser pendant 45 minutes sans couvrir, ni toucher ; évitez tout contact avec les vêtements ; après 45 minutes, lavez la zone de test avec de l'eau et séchez avec un tissu propre.	Breng met het wattenstaafje de grootte van een erwt van het mengsel gelijkmatig in een dunne laag aan op een gebied van 2 bij 2 cm aan de binnenkant van de onderarm. Laat het mengsel gedurende 45 minuten aanbrengen zonder het te bedekken of aan te raken; vermijd contact met kleding; was na 45 minuten het testgebied met water en dep droog met een schone papieren zakdoek.	Con un batuffolo di cotone, applicare una quantità di miscela delle dimensioni di un pisello in modo uniforme creando uno strato sottile su un'area di 2 per 2 cm sul lato interno dell'avambraccio. Lasciare la miscela applicata per 45 minuti senza coprirlo o toccarla; evitare il contatto con vestiti; dopo 45 minuti lavare l'area del test con acqua e asciugare tamponando con un panno pulito.
If you observe any changes to the normal skin appearance, such as itching, redness, swelling on and around the test area during the testing time, or during the following 48hrs, you should rinse off the test area immediately, should not use the product and should consult a doctor.	Wenn Sie während der Testzeit oder in den folgenden 48 Stunden Veränderungen des normalen Hautbildes wie Juckreiz, Rötungen, Schwellungen auf der und um die Teststelle herum beobachten, sollten Sie die Teststelle sofort abspülen, das Produkt nicht verwenden und einen Arzt aufsuchen.	Si vous observez des changements par rapport à l'apparence normale de la peau, tels que démangeaisons, rougeurs, gonflements sur et autour de la zone de test pendant le temps de pose ou au cours des 48 heures suivantes, vous devez rincer immédiatement la zone testée, ne pas utiliser le produit et consulter un médecin.	Als u veranderingen waarneemt in het normale uiterlijk van de huid, zoals jeuk, roodheid, zwelling op en rond het testgebied tijdens de testtijd of gedurende de volgende 48 uur, moet u het testgebied onmiddellijk afspülen, het product niet gebruiken en een arts raadplegen.	Se osservi cambiamenti nell'aspetto normale della pelle, come ad esempio prurito, arrossamento, gonfiore sopra e intorno all'area di prova durante il periodo di test, o durante le seguenti 48 ore, devi sciagquare immediatamente l'area in cui è stata effettuata la prova, non devi utilizzare il prodotto e dovresti consultare un medico.
This test represents an important precaution measure which has proved to be reliable when carried out under the conditions outlined. However, be aware that even if an Allergy Alert Test has been carried out without symptoms, you may still experience an allergic reaction when you colour your hair.	Dieser Test stellt eine wichtige Vorsichtsmaßnahme dar, die sich als zuverlässig erwiesen hat, wenn sie unter den beschriebenen Bedingungen durchgeführt wird. Beachten Sie jedoch, dass Sie auch nach symptomfreier Durchführung eines Allergie-Verdachtstestes beim Färben Ihrer Haare allergisch reagieren können.	Ce test représente une mesure de précaution importante qui a démontré sa fiabilité lorsqu'il est réalisé dans les conditions décrites. Néanmoins, sachez que même si un test d'alerte d'allergie a été fait, vous pouvez avoir une réaction allergique lorsque vous colorez vos cheveux.	Deze test vormt een belangrijke voorzorgsmaatregel die betrouwbaar is gebleken wanneer deze onder de beschreven omstandigheden wordt uitgevoerd. Houd er echter rekening mee dat zelfs als een allergie waarschuwingstest zonder symptomen is uitgevoerd, u toch een allergische reactie kunt krijgen wanneer u uw haar kleurt.	Questo test rappresenta un'importante misura precauzionale che si è dimostrata affidabile se attuata in conformità alle condizioni sopra delineate. Tuttavia, notare che anche se è stato eseguito questo test rivelatore di allergia, potresti comunque verificare una reazione allergica quando vengono colorati i capelli.
The Allergy Alert Test does not provide a guarantee that allergic reactions will not occur in the future.	Der Allergieverdachtstest bietet keine Garantie, zukünftige allergische Reaktionen auszuschließen.	Le test d'alerte d'allergie n'est pas une garantie d'éviter la survenue de réactions allergiques à l'avenir.	De allergie waarschuwingstest geeft geen garantie dat er in de toekomst geen allergische reacties zullen optreden.	Il test rivelatore di allergia non garantisce l'assenza di reazioni allergiche in futuro.
In case of any concerns or questions please consult a doctor.	Bitte wenden Sie sich bei Fragen oder im Zweifel an einen Arzt.	En cas de doutes ou de questions, veuillez consulter un médecin.	Raadpleeg een arts bij twijfel of vragen.	Si prega di consultare un medico nel caso si avessero dubbi.

Para preparar la mezcla son necesarios: Bastoncillo de algodón o espátula de madera, pañuelo de papel, bol o plato pequeño (no utilizar objetos metálicos)	Para preparar a mistura vai precisar de: cotonete, espátula de madeira, lenço de papel e tigela (não use objetos de metal).	Saker du behöver för att blanda: bomullspinne eller träpinne, servetter, tefat/assiett (använd inte metallföremål).	Tarvitset seuraavat välineet sekoitukseen: vanupuikko/puutikku, paperipyyhkeitä ja lautasen (älä käytä metallisia välineitä).	Ting du behøver for at blande: vatpind eller træpind, servetter, underkop/assiette (brug ikke metalgenstande)
Prepare la mezcla: Abra la botella aplicadora con loción reveladora desenroscando el tapón completo (no rompa la punta del mismo). Con ayuda del bastoncillo o de la espátula, deposite una pequeña cantidad de loción reveladora en el plato.	Prepare a mistura: Abra o frasco aplicador com locão reveladora desenroscando toda a tampa (não quebre a ponta da tampa). Usando o cotonete ou espátula, coloque uma pequena quantidade de locão reveladora na tigela.	Blanda: Öppna flaskan med utvecklingsemulsion genom att skruva av hela korken. Tag en liten mängd utvecklingsemulsion med bomullspinnen/träpinnen och lägg på fatet/assietten.	Sekoitus: Kierrä kehite-emulsiopullon korkki irti kokonaan. Opisani test je važna mera predostrožnosti koja se pokazala kao pouzdana kada se sprovede prema navedenim instrukcijama. Međutim, imajte na umu da čak i ako je alergijski test prošao bez simptoma, ipak može da se desi da imate alergijsku reakciju kada oboјite kosu.	Овој тест претставува значајна мерка за предупредување што се покажа сигурен ако се спроведува според упатствата. Но, треба да знаеме дека дури и ако се направи тест за алергија без симптоми, сепак може да има алергиска реакција кога ја бојосувате косата.	Ky test përfaqëson një masë të rëndësishme paraprake e cila ka rezultuar e sigurt në kushtet e përshkruara. Megjithatë, kini parasysh se edhe nëse një Test Alergik është bërë pa simptoma, ju mund të keni një reagim alergik kur ngjyrosni flokët tuaj.	Acest test reprezintă o măsură de precauție importantă care s-a dovedit a fi fiabilă atunci când este efectuat în condițiile prezentate. Cu toate acestea, rețineți că, chiar dacă un test de alertă de alergie a fost efectuat fără simptome, este posibil să apară o reacție alergică după aplicarea produsului.	Този тест представлява важна предпазна мярка, която е доказала своята надеждност, когато е извършена при посочените условия. Все пак имайте предвид, че дори ако тестът за предупредение за алергия е проведен без симптоми, е възможно да изпитате алергична реакция когато боядисате косата.	Цей тест є важливим надійним результатом при дотриманні вказаних умов. Заверіть увагу, що навіть при позитивному прохідному тесту не виключається можливість виникнення алергичної реакції під час самого фарбування.
Alergijski test nije garancija da u budućnosti neće imati alergijske reakcije.	Тестот за алергија не дава гаранција дека нема да се појават алергиски реакции во иднина.	Testi i Alergjisë nuk ję garant si reaguimnt alergike nuk do të ndodhin në të ardhmen.	Testul de alertă de alergie nu reprezintă o garanție că reacțiile alergice nu vor apărea în viitor.	Тестът за алергия не дава гаранция, че в бъдеще няма да се появят алергични реакции.	Даний тест не є гарантією відсутності прояви алергичних реакцій у майбутньому.
U slučaju nedoumica ili pitanja obratite se lekaru.	Во случај на загриженост или прашања, ве молиме обратете се со лекар.	Në rast se keni ndonjë shqetësim apo pyetje, ju lutemi konsultohuni me mjekun.	În cazul oricăror nelămuriri sau întrebări, vă rugăm să consultați un medic.	В случай на опасения или въпроси, моля, консултирајте се с лекар.	Якщо у Вас виникли будь-які запитання або сумніви, проконсультуйтеся з лікарем.
